

Maker Ecosystem Overview

What is Maker?

Dai:

Seeking stability on the blockchain

Stablecoin Engine:

Smart contract system that holds collateral reserves and controls the Dai lifecycle

MKR:

Open-source community managing the risk of the system

Last Year in Review

- Building an open-source community
- Investing in a solid technical core
 - Creating a unified development environment
 - MKR, Maker Market, Maker Auctions
 - "Move slow and audit things"
- Moving into the next phase of stablecoin development

Simplecoin Project

- Meeting the Ethereum community's need for stability
- An independent platform for creating centrally administered simple stablecoins
- Issuers create their own rule sets:
 - Collateral types
 - Participant whitelists
 - Security parameters
- Attract liquidity to automated markets in preparation for dai
